Armada Stained Glass

## **GLAAS Inc Workshop/Class Schedule 2022**

### **LEADLIGHT WORKSHOPS AND CLASSES**

These workshops are designed to introduce the art/craft of leadlight – an age-old skill which adapts to contemporary uses and is part trade/part visual arts.

In 2022 GLAAS will offer an ongoing weekly class on Thursday nights at Prahran 6-9pm.

This is for people who have had some experience in leadlight and know the basics, it is not designed for absolute beginners. It is also a good introduction to applying for the Certificate III Glass & Glazing (Designed Glazing) qualification course offered by Melbourne Polytechnic.

If you are a beginner (or out of practice) to prepare for this class we suggest the 'Intensive Introduction to Leadlighting' - a 2 day workshop being offered, in which the basics of the leadlighting process will be taught as well as OH & S, basic glass handling and other information. Class numbers will be limited to maximise the learning in the 10 hours of the workshop over 2 days.
